**TITLE 5—ADMINISTRATIVE PERSONNEL**

**Chapter I—Civil Service Commission**

**PART 24—FORMAL EDUCATION REQUIREMENTS FOR APPOINTMENT TO CERTAIN SCIENTIFIC, TECHNICAL, AND PROFESSIONAL POSITIONS**

**MISCELLANEOUS AMENDMENTS**

1. Paragraph (a) (1) of § 24.89 is amended as set out below. As amended, § 24.89 will read as follows:

§ 24.89 *Plant quarantine inspector, P-485-1—(a) Educational requirement.* Applicants must have successfully completed either (1) or (2) of the following:

(1) A full 4-year course in an accredited college or university leading to a bachelor's degree in biological science, with 20 semester hours in one or any combination of the following: Bacteriology, botany, entomology, horticulture, mycology, plant pathology, and zoology. (Biological courses which are useful in forming the educational foundation for a career as a plant quarantine inspector, such as silviculture, dendrology, and agrostology, regardless of the course title, will be accepted toward the required study in biological science; biological courses dealing primarily with vertebrate animals may not be accepted; majors in agricultural education may be broken down to courses and the applicable courses counted toward the required study in biological science.)

(2) Courses in biological science in an accredited college or university, consisting of lectures, recitations, and laboratory work totaling at least 20 semester hours in any one or a combination of the subjects shown under subparagraph (1) of this paragraph; plus additional appropriate experience which, when combined with the above 20 semester hours, will total 4 years of education and experience and give the applicant a technical knowledge comparable to that which would have been acquired through successful completion of a 4-year college course.

(b) *Duties.* Plant quarantine inspectors perform inspectional duties in connection with the various plant quarantines at ports of entry and make inspections of imported foreign plant material for injurious foreign insect pests and plant diseases.

(c) *Knowledge and training requisite for performance of duties.* The duties of plant quarantine inspector cannot be successfully performed without a knowledge of the plant quarantines and regulations and a scientific knowledge of plants, plant pests, and plant diseases. This knowledge and training can be gained only through a directed course of study in an accredited college or university with scientific libraries, well-equipped laboratories, and thoroughly trained instructors, where guidance is expertly given and progress is competently evaluated.

2. The headnotes of §§ 24.70, 24.71, 24.91, and 24.92 are amended to read as follows:

§ 24.70 *Fishery Research Biologist (positions involving highly technical research, design, or development, or similar complex scientific functions), P-435-2-6.*

§ 24.71 *Wildlife Research Biologist (positions involving highly technical research, design, or development, or similar complex scientific functions), P-499-2-6.*

§ 24.91 *Fishery Management Biologist, P-434-1; and Fishery Research Biologist, P-435-1.*

§ 24.92 *Wildlife Management Biologist, P-495-1; and Wildlife Research Biologist, P-499-1.*

Title VIII was added to the National Housing Act to establish a system of mortgage insurance for rental housing to serve the personnel of Military and Naval installations on substantially the same basis as is now available under section 608 of Title VI. However, the special problems involved and the different risk characteristics presented by such housing require an entirely new insurance fund for operation under this title. This new insurance fund is known as the Military Housing Insurance Fund.

(b) *Certification by the Secretary of Defense.* The primary difference between mortgages insured under Title VIII and those insured under section 608 is that under Title VIII the Commissioner is not required to make a determination of acceptable risk. In lieu of this determination, the Commissioner may accept a certification from the Military Establishment, that the housing is necessary, that such installation is deemed to be a permanent part of the Military Establishment, and that there is no present intention to curtail substantially the activities at such installation. Although the FHA is not required to make a determination of acceptable risk, it will nevertheless require the proposed project to demonstrate a rental income sufficient to pay operating and debt-service charges and would also require the project to meet sound standards of construction, design, and livability.

(c) *Processing and closing.* The administrative, fiscal, and legal procedure for the processing and closing of loans under Title VIII will be practically the same as for section 608 of Title VI. Substantially the same forms presently in use under section 608 shall be used except that these forms will be modified by deleting all reference to Title VI and section 608 and inserting, in lieu thereof, Title VIII.

(Title VIII, Pub. Law 211, 81st Cong.)

[SEAL]

DONALD M. ALSTRUP,  
Assistant Commissioner.

## STEEL MILL PRODUCTS—Continued

Iron and steel bars, and rods (include bar size shapes)—Con.  
Concrete reinforcement bars (deformed and twisted only).  
Other steel bars and rods (hot-rolled):  
Other steel bars, carbon steel.  
Other steel bars, alloy steel.  
Other steel bars, stainless steel.  
Alloy steel, except stainless (report stainless in 602500).  
Wire rods (for further manufacture), except specialty steel.  
Wire rods, specialty steel.  
Plates, including boiler plate, except fabricated:  
Carbon steel:  
Hot-rolled.  
Cold-rolled.  
Stainless steel:  
Boiler plate, hot-rolled.  
Other plates, hot-rolled.  
Boiler plate, cold-rolled.  
Other plates, cold-rolled.  
Alloy steel, except stainless:  
Hot-rolled.  
Cold-rolled.  
Skelp iron and steel.  
Iron and steel sheets, galvanized:  
Galvanized iron culvert sheets.  
Galvanized iron culvert sections.  
Other galvanized iron sheets.  
Galvanized steel culvert sheets.  
Galvanized steel culvert sections.  
Other galvanized steel sheets.  
Steel sheets, black, ungalvanized (include enameled, lacquered, or painted):  
Carbon steel:  
Hot-rolled, except enameled, lacquered, or painted.  
Hot-rolled, enameled, lacquered, or painted.  
Cold-rolled, except enameled, lacquered, or painted, and except tin-mill black plate rejects, wasters, and waste-wasters, and cold-rolled sheets, rejects.  
Cold-rolled, enameled, lacquered, or painted, and tin-mill black plate rejects, wasters, and waste-wasters, and cold-rolled sheets, rejects.  
Stainless steel:  
Hot-rolled.  
Cold-rolled.  
Alloy steel, except stainless:  
Hot-rolled, except enameled, lacquered, or painted.  
Hot-rolled, enameled, lacquered, or painted.  
Cold-rolled, except enameled, lacquered, or painted.  
Cold-rolled, enameled, lacquered, or painted.  
Electrical (steel) sheets, except transformer grades.  
Iron sheets, black, except enameled, lacquered, or painted.  
Iron sheets, black, enameled, lacquered, or painted.  
Strip, hoop, band, and scroll, iron and steel (including enameled, lacquered, and painted):  
Cold-rolled carbon steel, gliding metal clad.  
Cold-rolled carbon steel, except gliding metal clad.  
Cold-rolled stainless steel.  
Cold-rolled alloy steel, except stainless.  
Hot-rolled carbon steel, gliding metal clad.  
Hot-rolled carbon steel, except gliding metal clad.  
Hot-rolled stainless steel.  
Hot-rolled alloy steel, except stainless.  
Tinplate.  
Waste-waste tinplate.  
Tinplate, hot dipped.  
Tinplate, electrolytic.  
Tinplate, decorated, embossed, lithographed, lacquered, or otherwise advanced, including lithographic misprints.  
Terneplate (long terms included).  
Structural iron and steel:

Export controls applicable to each commodity under these classifications are those which apply to the commodity when exported commercially under its individual Schedule B number.

Export controls applicable to each commodity under this classification are those which apply to the commodity when exported under its individual Schedule B number.

Shipments of any of the above commodities whose former GLV dollar value limits have been reduced, as a result of the provisions of this amendment, which were on dock, on lighter, laden aboard an exporting carrier, or in transit to a port of exit pursuant to actual orders for export prior to the effective date of this amendment, may be exported under the previous general license provisions up to and including September 12, 1949.

#### GENERAL NOTES TO APPENDIX A

The Positive List of Commodities includes those commodities which require a validated export license from the Department of Commerce for shipment to any destination, whether to Country Group R and O destinations or to Country Group R destinations only. (Commodities licensed by other agencies of the Government are described in §§ 370.5, 370.6, and 370.7 of this subchapter.)

Each commodity is identified (in the column headed "Validated License Required") either as an R or an RO commodity, indicating the respective Country Groups for which validated licenses must be obtained.

Commodities are listed in numerical order by Schedule B numbers, which appear in the first column of the table. These numbers correspond with those shown in the Department of Commerce publication, Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States, and must be shown on all export license applications.

For each commodity there is a four-letter code index (MEAT, STEE, CERL). This processing code, followed by a dash and the letters "RO" must be shown on all license applications covering RO commodities on the Positive List. Applications for licenses to export R commodities must show the appropriate processing code for each commodity, followed by a dash and the letter "R".

RO commodities may not be entered on the same license application with R commodities.

A number follows the processing code in many instances. It is the related commodity group number and indicates that all commodities having the same processing code and number may be entered on a single application for individual export license when they are destined to one consignee. For example, all commodities coded NONF 1 may be entered on one application. Those having different codes (NONF 1 and NONF 2 or NONF 2 and SEED 2) must be listed on separate applications. (See § 372.2 (c) of this subchapter for complete information on the export of related commodities on individual license.) (See also Part 375 of this subchapter for provisions concerning commodity processing codes and related commodity groups applicable to exportations under the BLT license procedure.)

Where the commodity description of a Schedule B number on the Positive List of Commodities mentions only a part of the commodities covered by the Schedule B listing, only the commodity or commodities specifically mentioned are included on the Positive List.

The quantity classifications given for each commodity in the column headed "Unit" must be shown on export license applications. If there is no entry in the Unit column, the application should show the unit of quantity commonly used in the trade.

The column headed "GLV Dollar-Value Limits" has reference to the value limits under the general license. Shipments of Limited Value, GLV, established by § 371.10 of this subchapter.

The commodity processing codes, referred to in the column headed "Processing Code and Related Commodity Groups", are used to facilitate the routing and processing of export license applications. Related commodities are commodities which have the same

processing code symbol and the same number following such symbol.

The abbreviation "n. e. s." appearing in the various entries on the Positive List of Commodities means "not elsewhere specified".

The column headed "Validated License Required" is used to indicate whether a commodity is identified as an R or an RO commodity. A validated license is required for the exportation of Group RO commodities to both Country Groups R and O destinations. A validated license is required for exportations of R commodities to Country Group R destinations only. However, a validated license is not required if the exportation can be made under one of the general licenses, as set forth in Part 371, or under other provisions permitting the exportation without license.

2. Section 399.3 *Appendix C—Commodity processing codes* is hereby deleted.

3. Section 399.4 *Appendix D—Related commodity groupings for non-Positive List commodities to Group R destinations; single license applications* is hereby deleted.

This amendment shall become effective August 12, 1949.

### Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

[Tokay Grape Order 3]

PART 951—TOKAY GRAPES GROWN IN CALIFORNIA

#### LIMITATION OF LOADING AND PACKAGING

§ 936.306 *Tokay Grape Order 3—(a) Findings.* (1) Pursuant to the marketing agreement, as amended, and Order

No. 51, as amended (7 CFR Part 951; 14 F. R. 440), regulating the handling of Tokay grapes grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Industry Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that to limit completely the loading and packaging of Tokay grapes, as herein-after provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than September 3, 1949. The maximum quantity of Tokay grapes currently permitted to be released each day from assembly points for continued shipment is regulated pursuant to the provisions of Tokay Grape Order 2 (§ 951.305; 14 F. R. 5341), whereby the advisable quantity to be released each day is fixed at not more than 88,400 standard packages; in accordance with the provisions of the amended marketing agreement and order, the maximum time that Tokay grapes may be held at assembly points is seventy-two (72) hours; information available to the Industry Committee on August 29, 1949, was to the effect that, in the absence of additional regulation pursuant to the applicable provisions of the amended marketing agreement and order, the quantity of Tokay grapes loaded or en route to assembly points will, beginning on or about September 3, 1949, be substantially in excess of 88,400 standard packages; recommendation as to the need for, and the extent of, regulation of loading and packaging of Tokay grapes was made at the meeting of said committee on August 29, 1949, at which time the recommendation and supporting information were transmitted to the Department and made available to handlers and producers of Tokay grapes; the provisions of this section are the same as the aforesaid recommendation of the committee; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed prior to the effective time hereof.

(b) *Order.* During the period beginning at 12:01 a. m., P. s. t., September 3, 1949, and ending at 12:01 a. m., P. s. t., September 5, 1949, no handler shall load or package grapes for shipment to assembly points.

(c) *Definitions.* As used in this section, the terms "shipments," "shipped,"

"grapes," "handler," "load," "package," and "advisable" shall have the same meaning as when used in said amended marketing agreement and order; and "standard packages" and "assembly points" shall have the meaning set forth therein in § 951.101 of the Industry Committee regulations (7 CFR Part 951).

## TITLE 47—TELECOMMUNICATION

### Chapter I—Federal Communications Commission

#### PART 1—PRACTICE AND PROCEDURE

APPLICATION FOR NEW OR MODIFIED RADIO STATION CONSTRUCTION PERMIT (OTHER THAN BROADCASTING)

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 24th day of August 1949;

The Commission having under consideration the revision of F. C. C. Form 401, Application for new or modified radio station construction permit (other than broadcasting); and

It appearing, that the proposed revision merely changes the layout of the form, with corresponding changes in wording where necessary, for the purpose of facilitating the preparation and submission of the form by the industry and for the further purpose of permitting a more economical and expeditious processing by the Commission; and

It further appearing, that the proposed revisions are editorial in nature and do not in any manner change the kind or extent of information required; and

It further appearing, that the nature of the revision of the form is such as to render unnecessary the notice and procedure provided for in section 4 of the Administrative Procedure Act; and

It further appearing, that authority to make the changes in the form is contained in sections 303 (r) and 308 (b) of the Communications Act of 1934, as amended:

*It is ordered,* That, effective immediately, the revision of F. C. C. Form 401, as attached,<sup>1</sup> is adopted.

(Sec. 303 (r), 50 Stat. 191; 47 U. S. C. Applies 308 (b), 48 Stat. 1084; 47 U. S. C. 308 (b))

Released: August 25, 1949.

PART 3—RADIO BROADCAST SERVICES  
STANDARDS OF GOOD ENGINEERING PRACTICE  
CONCERNING STANDARD BROADCAST STATIONS

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 24th day of August 1949;

The Commission having under consideration the above entitled matter; and

It appearing, that the Commission's table of sunrise and sunset times, section 26 of the Commission's Standards of Good Engineering Practice Concerning Standard Broadcast Stations (FEDERAL REGISTER, June 5, 1948), gives the sunrise time for the month of January at McKeesport, Pennsylvania, as 7:30 a. m., but that the correct time calculated in accordance with the Commission's public notice of August 20, 1948 (Docket 9134) (13 F. R. 5011) is 7:45 a. m., and that correction of the tables is desirable; and

It further appearing, that the Commission on March 9, 1949, adopted a public notice in this matter proposing to correct the tables (FCC 49-245), and that this public notice was published in the FEDERAL REGISTER on March 19, 1949 (14 F. R. 1232), and that this public notice invited interested persons to submit to the Commission their comments on the proposed change on or before April 18, 1949; and

It further appearing, that the time for filing comments has expired, and that no comments have been received; and

It further appearing, that authority for this change is vested in the Commission by the Communications Act of 1934, as amended, particularly sections 303 (f) and (r) thereof;

*It is therefore ordered*, That effective October 1, 1949, the sunrise and sunset tables of section 26 of the Commission's Standards of Good Engineering Practice Concerning Standard Broadcast Stations are amended, as proposed in the above public notice, to indicate a sunrise time of 7:45 a. m. at McKeesport, Pennsylvania during the month of January.

(Sec. 303 (r), 50 Stat. 191; 47 U. S. C. 303 (r) Applies 303 (f), 48 Stat., 1082; 47 U. S. C. 303 (f))

PART 3—RADIO BROADCAST SERVICES  
STANDARDS OF GOOD ENGINEERING PRACTICE  
CONCERNING STANDARD BROADCAST STATIONS

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 24th day of August 1949;

The Commission having under consideration the above-entitled matter; and

It appearing that the Commission's table of sunrise and sunset times, section 26 of the Commission's Standards of Good Engineering Practice Concerning Standard Broadcast Stations (FEDERAL REGISTER, June 5, 1948) contain certain figures for Paducah and Mayfield, Kentucky, which recalculations have indicated to be incorrect, and that correction of the tables is desirable; and

It further appearing that the Commission on March 9, 1949 adopted a public notice in this matter proposing certain corrections in the tables (FCC 49-244), and that this public notice was published in the FEDERAL REGISTER on March 19, 1949 (14 F. R. 1262), and that this public notice invited interested persons to submit to the Commission their comments

PART 8—SHIP RADIO SERVICE  
ALLOCATION OF FREQUENCIES

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 24th day of August 1949;

The Commission having under consideration its order of June 15, 1949, amending the Commission's rules by allocating, effective August 1, 1949, the frequency 2003 kilocycles for assignment to ship stations on the Great Lakes as an intership working frequency in place of the intership working frequency 2738 kilocycles; and having under consideration an application filed by Lorain County Radio Corporation (station licensee of a large number of Great Lakes Ship Stations) requesting that the Commission take such action as might be necessary to permit Great Lakes Ship Stations to use the frequency 2182 kilocycles as an intership working frequency for a period of two months during which the change from the frequency 2738 kilocycles to the frequency 2003 kilocycles could be accomplished;

It appearing, that the majority of Great Lakes ship radiotelephone stations are of a fixed tuned type, operable on only one intership working frequency in the 2 megacycle band, and such equipment, if adjusted for intership working on the frequency 2003 kilocycles would be unable to engage in intership working

on the proposed changes on or before April 18, 1949; and

It further appearing that the time for filing comments has expired, and that no comments have been received; and

It further appearing that authority for these changes is vested in the Commission by the Communications Act of 1934, as amended, particularly sections 303 (f) and (r) thereof;

*It is therefore ordered*, That, effective October 1, 1949, the sunrise and sunset tables of section 26 of the Commission's Standards of Good Engineering Practice Concerning Standard Broadcast Stations are amended, as proposed in the above public notice, to indicate the following sunrise and sunset times for Paducah and Mayfield, Kentucky:

with ship stations remaining adjusted for such working on the frequency 2738 kilocycles; and

It further appearing, that during the two month transition period requested by the Lorain County Radio Corporation to complete the change from 2738 kilocycles to 2003 kilocycles it would be in the public interest to provide ships on the Great Lakes with a common intership working frequency in the 2 megacycle band whereby they would be assured of a continuing means of exchanging operational communications; and

It further appearing, that all radio-telephone equipped ships on the Great Lakes licensed for operation on a 2 megacycle intership working frequency are capable of operating on the frequency 2182 kilocycles although § 8.54 (c) and § 8.98 (a) of the Commission's rules restrict the use of this frequency generally to calling, answering and safety functions; and

It further appearing, that in view of the foregoing it would be impracticable to comply with the public notice and procedure for rule making provided by section 4 of the Administrative Procedure Act for the purpose of amending §§ 8.54 (c) and 8.98 (a) of the Commission's rules to permit the immediate, temporary use of the frequency 2182 kilocycles as an intership working frequency on the Great Lakes during the transition period hereinabove referred to, and for the foregoing reasons and also because such amendment would relieve an existing restriction in regard to the use of the frequency 2182 kilocycles, such amendment should be made effective without delay; and

It further appearing, that authority for the amendment herein ordered is contained in sections 4 (i), 303 (f) and (r) of the Communications Act of 1934, as amended;

*It is ordered*, That effective August 29, 1949, Part 8 of the Commission's rules

governing ship service be amended as set forth below.

(Sec. 4 (i), 48 Stat. 1066; 303 (r), 50 Stat. 191; 47 U. S. C. 154 (i), 303 (r). Applies 303 (f), 48 Stat. 1082; 47 U. S. C. 303 (f))

FEDERAL COMMUNICATIONS  
COMMISSION,  
[SEAL] T. J. SLOWIE,  
Secretary.

AUGUST 25, 1949.

Part 8 of the Commission's rules governing ship service is amended as follows:

1. In § 8.54 (c), the following footnote is added after the colon following the words "only for":

"In addition to the use permitted of the frequency 2182 kilocycles as shown in this paragraph (c) this frequency may also be used as an intership working frequency by ship telephone stations in the Great Lakes area from the 29th day of August 1949, to the 31st day of October 1949, inclusive.

2. In § 8.93 (a), the following footnote is added after the period ending the sentence:

"In addition to the use permitted of the frequency 2182 kilocycles as shown in this paragraph (a), this frequency may also be used as an intership working frequency by ship telephone stations in the Great Lakes area from the 29th day of August 1949, to the 31st day of October 1949, inclusive.

#### NOTICE OF HEARING

Notice is hereby given, pursuant to the provisions of section 5 of the Federal Alcohol Administration Act (49 Stat. 981; 27 U. S. C. 205), of a public hearing to be held on October 3, 1949, at 10 a. m. at Room 1318, Department of Justice Building, Washington, D. C., at which time and place all interested parties will be afforded opportunity to be heard, in person or by authorized representative, with reference to certain proposals, the substance of which is stated below, to amend Regulations No. 5 (27 CFR, Part 5), relating to labeling and advertising of distilled spirits.

Written data, views or arguments relevant and material to these proposals may be submitted in duplicate for incorporation into the record of said hearing (1) by mailing the same addressed to the Deputy Commissioner in charge of the Alcohol Tax Unit, Bureau of Internal Revenue, Washington 25, D. C., provided that they are received prior to the termination of the hearing, or (2) by presenting the same at the said hearing. Material relating to each proposal shall be submitted separately and shall bear the number of the proposal to which it relates. At the conclusion of the hearing a reasonable opportunity will be afforded interested parties for the examination of the record and for the submission of briefs.

1. To amend 27 CFR 5.1 (j) (Article I (j)) and 27 CFR 5.39 (a) (Sec. 39 (a)) to provide that "age" for all whiskies of the traditional American types (except for the various types of corn whisky) may include, in addition to a period of storage in charred new oak containers, any prior period of storage in reused charred oak containers but only if the labels on the containers of such whiskies bear the statement "\_\_\_\_ years and/or months in reused cooperage" as a part of the age statement.

2. To amend 27 CFR 5.21 (b) (Sec. 21, Class 2) so as to provide that "rye whisky", "bourbon whisky", "wheat whisky", "malt whisky" and "rye malt whisky" must be stored for a minimum

period of 18 calendar months in charred new oak cooperage, and so as to provide that "straight whisky", "straight rye whisky", "straight bourbon whisky", "straight wheat whisky", "straight malt whisky", and "straight rye malt whisky" must be stored for a minimum period of 24 calendar months in charred new oak cooperage.

[Docket No. 9425]

#### FACSIMILE BROADCASTING

#### NOTICE OF HEARING

In the matter of amendment of Part 3, Subpart B, § 3.266 (b) of the Commission's rules and regulations, and sections 1 and 8 of the Standards of Good Engineering Practice Concerning FM Broadcast Stations, pertaining to facsimile broadcasting.

1. Notice is hereby given that a hearing will be held on December 12, 1949, at 10 a. m. in Room 6121, New Post Office Building, Twelfth and Pennsylvania Avenue, in Washington D. C., before the Commission en banc in the above entitled matter for the purpose of obtaining information regarding multiplex facsimile and FM aural broadcasting and determining the issues set forth below.

2. By its report and order in Docket No. 8751, adopted June 9, 1948, the Commission amended § 3.266 (b) of its rules and regulations, effective July 15, 1948, so as to allow FM broadcast stations to "transmit multiplex facsimile and aural broadcasting programs for a maximum of three hours between the hours of 7 a. m. and midnight (no limit for the hours between midnight and 7 a. m.) in accordance with transmission standards set forth in the Standards of Good Engineering Practice Concerning FM Broadcast Stations, provided that the transmission of facsimile does not impair the quality of the aural programs below 10,000 cycles per second, and that a filter or other additional equipment is not re-

quired for receivers not equipped to receive facsimile." The above report and order also amended sections 1 and 8 of the Standards of Good Engineering Practice Concerning FM Broadcast Stations by the addition of various definitions and standards applicable to facsimile broadcasting.

3. In its report and order in Docket No. 8751, the Commission stated that it was "of the opinion that ultimately a suitable multiplex system must be developed if FM and facsimile are to operate in the same band. The Commission expects that extensive research will be undertaken looking toward the development of a multiplex facsimile system, particularly one which will not cause any degradation to the full tone range of which FM is capable." The Commission stated further that "all interested persons are strongly urged to continue multiplex experimentation so that a system can be developed at an early date which involves no degradation of the aural program below 15,000 cycles. In this way, simplex operation can be eliminated entirely and multiplexing will be possible during all hours."

4. On May 27, 1949, Radio Inventions, Inc. filed a petition for rule making for the purpose of amending § 3.266 (b) of the Commission's rules and regulations by withdrawing "permission to operate a multiplex system which will degrade simultaneous FM facsimile-sound programs below 15,000 cycles," and by allowing multiplex facsimile and FM aural transmitting at all times. Radio Inventions, Inc., alleges it has carried on "intensive work on the development of a facsimile-and-sound multiplex system which would meet all possible requirements" and has produced such a system which "on bench tests, was found to cause no impairment of the aural spectrum below 15,000 cycles and to cause no interference in standard FM sound receivers." Pursuant to special authorization, field tests were made over Station WQXR-FM, New York, New York between September 8th and 16th, 1948; over Station WFIL-FM, Philadelphia, Pennsylvania on September 22, 1948 and on FM Station WEAU, Evanston, Illinois on September 25th to 29th, 1948. Additional field operations were then conducted over WMAQ-FM, Chicago, Illinois from April 5th to 12th, 1949. Radio Inventions, Inc. further alleges that during all of the above field tests "no complaints

of facsimile interference were received from listeners and no degradation of the sound program, or interference with the two simultaneous services, were experienced." Finally, Radio Inventions, Inc. states that it "believes that there has been developed and proved a facsimile sound multiplex system which meets the requirements set forth by the Commission, and that the Commission is now justified in amending" § 3.266 (b).

5. It is desirable that the Commission be fully informed as to the status of multiplex facsimile and FM aural broadcasting so that it may determine whether such a suitable multiplex system has been developed "which will not cause any degradation to the full tone range of which FM is capable" thereby permitting the Commission to amend § 3.266 (b) of its rules and regulations.

6. Authority for the issuance of rules and standards pertaining to the above matters is contained in sections 301 and 303 (b), (c), (e), (f), (g), and (r) of the Communications Act of 1934, as amended.

7. The said hearing will be held on the following issues:

(a) To obtain full information concerning existing or proposed methods or systems of multiplex facsimile and FM aural broadcasting.

(b) To obtain full information concerning the present and expected availability of multiplex facsimile and FM aural transmitting and receiving equipment.

(c) To obtain full information concerning any technical data obtained in experimental operations conducted in multiplex facsimile and FM aural broadcasting.

(d) To obtain full information concerning any non-technical data obtained in experimental operations conducted in multiplex facsimile and FM aural broadcasting, or otherwise available, including public demand for the service and public needs and desires for multiplex facsimile and FM aural programs.

(e) To obtain full information concerning the plans or proposals of interested persons which look toward the establishment of multiple facsimile and FM aural broadcasting on a commercial basis.

(f) To obtain full information concerning transmission standards for multiplex facsimile and FM aural broadcasting proposed by any interested persons.

(g) To obtain full information concerning United States patents with claims directed to or covering multiplex facsimile transmission systems or equipment.

(h) To determine, in the light of the evidence adduced on the foregoing issues, whether § 3.266 (b) of the Commission's rules and regulations should be amended.

(i) To determine, in the light of the evidence adduced on the foregoing issues, whether the standards pertaining

to facsimile broadcasting (sections 1 and 8 of the Commission's Standards of Good Engineering Practice Concerning FM Broadcast Stations) should be amended.

8. Any interested persons desiring to appear and submit evidence at the said hearing shall file a notice of appearance with the Commission on or before November 28, 1949. Such persons, and any other interested persons desiring to comment on the matters set forth in the above issues, may file data, views or arguments with the Commission on or before November 28, 1949. Fifteen copies of such data, views or arguments shall be filed as required by § 1.764 of the Commission's rules and regulations.

9. Any person filing a notice of appearance, or data, views and arguments, who owns or has the right to sublicense United States unexpired patents with claims directed to or covering multiplex facsimile transmission systems or equipment shall file a statement on or before November 28, 1949, showing (i) the number of each such patent, and (ii) the pertinent claims therein.

Adopted: August 24, 1949.

Released: August 25, 1949.

## FEDERAL POWER COMMISSION

[Docket No. G-1262]

AMERE GAS UTILITIES CO.

### NOTICE OF APPLICATION

AUGUST 29, 1949.

Take notice that Amere Gas Utilities Company (Applicant), a West Virginia corporation, 1033 Quarrier Street, Charleston, West Virginia, filed on August 17, 1949, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of certain transmission pipe line facilities hereinafter described.

Applicant proposes to sell natural gas for resale to Bluefield Gas Company (Bluefield), or, in the alternative, to such other person, firm or corporation as shall be designated by Bluefield to redeliver said gas to it, and for such purpose to construct and operate a measuring and regulating station at a point on Applicant's 5 $\frac{1}{16}$ -inch I. D. natural-gas transmission pipe line in Princeton, West Virginia. The requirements of Bluefield to be supplied by Applicant are estimated to be 66,700 Mcf in 1950, increasing to 235,000 Mcf in 1953. The estimated peak day deliveries for the winter 1950-1951 are 750 Mcf; and for the winter 1952-53, 1,700 Mcf.

The estimated cost of the proposed facilities to be constructed by Applicant is approximately \$9,000, and will be financed from funds on hand.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) within 15 days from the date of publication hereof in the FEDERAL REGISTER. The application is on file with the Commission for public inspection.

[Docket No. G-1263]

UNITED GAS PIPE LINE CO.

### NOTICE OF APPLICATION

AUGUST 29, 1949.

Take notice that United Gas Pipe Line Company (Applicant), a Delaware corporation, having its principal place of business at 1525 Fairfield Avenue, Shreveport, Louisiana, filed on August 18, 1949, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation

of certain transmission pipe line facilities hereinafter described.

Applicant proposes to transport and sell natural gas for resale primarily to Atlantic Gulf Gas Company at a common delivery point near Pointe a la Hache, Plaquemines Parish, Louisiana, under the terms of a contract entered into between the parties on July 27, 1949, and secondarily to its existing customers on its present natural gas pipe line system. For such purpose, Applicant proposes to construct and operate approximately 224 miles of natural gas transmission pipe lines extending from gas producing fields located in the southeastern part of the State of Louisiana to the point of interconnection of such facilities at Pointe a la Hache, Louisiana, with the proposed facilities of Atlantic Gulf Gas Company. The proposed pipe line system will consist of three parts, each of which will gather natural gas from two or more producing oil or gas fields and transmit the natural gas to the common delivery point referred to above:

(1) A 20-inch, 24-inch, and 26-inch natural gas transmission pipe line will connect the Horse Shoe Bayou and Bayou Sale Fields in St. Mary Parish via the Lirette Field in Terrebonne Parish with the common delivery point in Plaquemines Parish, and that line, in turn, will connect with the Bateman Lake Field, in St. Mary Parish, Louisiana, by means of a 20-inch natural gas transmission lateral.

(2) A 6-inch natural gas transmission pipe line will connect the Garden Island Bay Field with the Delta Duck Club Field, at which point a 10-inch natural gas transmission pipe line connecting the Main Pass—Block Sixty-nine Field will tie in. A 12-inch natural gas transmission pipe line will extend via the Grand Bay Field to a point where a 12-inch natural gas transmission pipe line connecting the West Bay and Venice Fields will tie in. From the latter point, a 16-inch natural gas transmission pipe line will extend to the common delivery point. The 16-inch pipe line will be connected to the Bastian Bay Field by an 8-inch natural gas transmission lateral and to the Quarantine Bay Field and the Potash Field by a 6-inch natural gas transmission lateral. All these facilities are proposed to be constructed in Plaquemines Parish, Louisiana.

(3) A 10-inch natural gas transmission pipe line will extend from the De La Croix Field via the Pointe a la Hache Field to the common delivery point, and will be located entirely in Plaquemines Parish, Louisiana.

The requirements of Atlantic Gulf Gas Company on a maximum day are estimated to be approximately 384,251 Mcf during the fifth year of operation and the estimated total minimum day requirements are estimated to be 200,000 Mcf.

The estimated cost of the proposed facilities is \$25,060,000, which Applicant expects to finance either (1) by borrowing from its parent, United Gas Corporation, and issuing unsecured notes for the amount of such borrowings, or (2) by selling bonds to its parent in accordance with Applicant's mortgage and

deed of trust dated September 25, 1944.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) within 15 days from the date of publication hereof in the **FEDERAL REGISTER**. The application is on file with the Commission for public inspection.

## FEDERAL TRADE COMMISSION

[Docket No. 5580]

STANDARD DISTRIBUTORS, INC.

ORDER APPOINTING TRIAL EXAMINER AND  
FIXING TIME AND PLACE FOR TAKING  
TESTIMONY

At a regular session of the Federal Trade Commission, held at its office in the city of Washington, D. C., on the 26th day of August A. D. 1949.

In the matter of Standard Distributors, Inc., a corporation, Le Roy S. Blumstein, David Tuttle, and A. J. Noreus, individually and as officers of Standard Distributors, Inc., a corporation.

This matter being at issue and ready for the taking of testimony and the receipt of evidence, and pursuant to authority vested in the Federal Trade Commission,

It is ordered, That Frank Hier, a trial examiner of this Commission, be and he hereby is designated and appointed to take testimony and receive evidence in this proceeding and to perform all other duties authorized by law;

It is further ordered, That the taking of testimony and the receipt of evidence begin on Thursday, September 8, 1949, at ten o'clock in the forenoon of that day (Central Standard Time), in Court Room 307, U. S. Court House, Marquette Avenue and Third Street, Minneapolis, Minnesota.

Upon completion of the taking of testimony and receipt of evidence in support of the allegations of the complaint, the trial examiner is directed to proceed immediately to take testimony and evidence on behalf of the respondents. The trial examiner will then close the taking of testimony and evidence and, after all intervening procedure as required by law, will close the case and make and serve on the parties at issue a recommended decision which shall include recommended findings and conclusions, as well as the reasons or basis therefor, upon all the material issues of fact, law, or discretion presented on the record, and an appropriate recommended order; all of which shall become a part of the record in said proceeding.

By the Commission.

## SECURITIES AND EXCHANGE COMMISSION

[File Nos. 70-1825, 70-2091, 70-2160, 70-2170]

NARRAGANSETT ELECTRIC CO. ET AL.

MEMORANDUM OPINION AND INTERIM ORDER  
GRANTING APPLICATION

At a regular session of the Securities and Exchange Commission held at its office in the city of Washington, D. C. on the 29th day of August A. D. 1949.

In the matter of the Narragansett Electric Company, File No. 70-2091; Attleboro Steam and Electric Company, Beverly Gas and Electric Company, Central Massachusetts Electric Company, Eastern Massachusetts Electric Company, Gardner Electric Light Company, Gloucester Electric Company, Gloucester Gas Light Company, Granite State Electric Company, Haverhill Electric Company, Lawrence Gas and Electric Company, the Lowell Electric Light Corporation, Malden and Melrose Gas Light Company, Worcester Suburban Electric Company, New England Power Company, Northampton Electric Lighting Company, Quincy Electric Light and Power Company, Northern Berkshire Gas Company, Salem Gas Light Company, Southern Berkshire Power & Electric Company, Suburban Gas and Electric Company, Wachusett Electric Company, Weymouth Light and Power Company, Worcester County Electric Company, File No. 70-1825; New England Power Company, New England Electric System, File No. 70-2160; Worcester County Electric Company, File No. 70-2170.

On July 18, 1949, nine subsidiary companies of New England Electric System ("NEES"), a registered holding company, filed a combined application under section 6 (b) of the Public Utility Holding Company Act of 1935, for authority to issue additional unsecured short-term promissory notes, due May 31, 1951, to evidence borrowings in the aggregate amount of \$2,290,000. Such application amends an earlier application (summarized in Holding Company Act Release No. 8253) by the borrowing subsidiary companies identified by the Commission's File No. 70-1825.

On August 5, 1949, the Commission ordered a public hearing on said combined application in order that the record in this consolidated proceeding might be developed with respect to the construction program of the NEES system companies and the financing thereof. After appropriate notice, the hearing was held on August 23, 1949, at which a witness for NEES and the applicant companies testified that the recommendations of an outside consulting firm retained to make an over-all study of the construction and financing program of NEES and its subsidiary companies would not be available to the NEES management until September 6, 1949. In view of this, the hearing was continued to September 20, 1949, at which time NEES and its subsidiary companies expect to submit a definitive system construction and financing program.

At the hearing on August 23, 1949, four of the applicant subsidiary companies, namely, Attleboro Steam and Electric

Company ("Attleboro"), Central Massachusetts Electric Company ("Central Massachusetts"), Southern Berkshire Power & Electric Company ("Southern Berkshire"), and Worcester County Electric Company ("Worcester County"), requested an interim order authorizing the issuance and sale of additional promissory notes by said companies to provide for their immediate cash needs which it was stated must be met prior to the presentation of the system's over-all financing program. The proposed notes would be issued pursuant to such companies' Bank Letter Agreement, the provisions of which are summarized in Holding Company Act Release No. 8253. The issuance and sale of said notes have been expressly authorized by the Department of Public Utilities of Massachusetts, the State in which such four companies are organized and doing business, and are solely for the purpose of financing the business of such four companies.

The Commission finds that it is appropriate in the public interest and for the protection of investors and consumers to issue an interim order authorizing Attleboro, Central Massachusetts, Southern Berkshire, and Worcester County to issue and sell prior to September 1, 1949, \$50,000, \$50,000, \$90,000, and \$750,000, respectively, of such additional short-term promissory notes. Such finding, of course, in no way involves the determination of the issues raised in this consolidated proceeding and should not, in any way, be construed as a determination that the Commission will continue to approve further short-term note borrowings. Said four companies requested that the Commission's order herein become effective upon the issuance thereof and the Commission deems it appropriate to grant such request.

It is ordered, Pursuant to section 6 (b) of the act, that the application, as amended, of Attleboro, Central Massachusetts, Southern Berkshire, and Worcester County for exemption from section 6 (a) of the act of the issue and sale, prior to September 1, 1949, of \$50,000, \$50,000, \$90,000, and \$750,000, respectively, of additional promissory notes, payable May 31, 1951, be, and the same hereby is granted forthwith, subject to the terms and conditions prescribed in Rule U-24 promulgated under the act.

By the Commission.

Assistant Secretary.

MILWAUKEE SOLVAY COKE CO.

ORDER GRANTING APPLICATION

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 26th day of August A. D. 1949.

Milwaukee Solvay Coke Company ("Solvay"), a non-utility indirect subsidiary of American Natural Gas Company, a registered holding company, having filed an application pursuant to the

provisions of section 6 (b) of the Public Utility Holding Company Act of 1935, with respect to the following transactions:

Solvay proposes, during September, October and November 1949, to borrow from two Milwaukee banks \$825,000 and to issue in evidence thereof its promissory notes in varying amounts with varying maturities of 90 to 180 days and with an interest rate of not more than 2% per annum.

The application states that the proceeds of the loans, together with \$175,000 to be borrowed during August 1949 pursuant to the exemption available under the first sentence of section 6 (b) of the act, are to be used to finance coal purchases and maintain working capital necessary to carry the company's operations through the first quarter of 1950.

It is stated that no State Commission or Federal Commission, other than this Commission, has jurisdiction over the proposed transactions.

The said application having been filed on August 8, 1949, and notice of said filing having been duly given in the form and manner prescribed by Rule U-23 promulgated pursuant to said act and the Commission not having received a request for hearing with respect to said application within the period specified in said notice, or otherwise, and not having ordered a hearing thereon; and

The Commission finding with respect to said application that the issue and sale of said notes meet the requirements of section 6 (b) of the act for an exemption from the provisions of section 6 (a) thereof, and finding no basis for imposing terms and conditions, and the Commission deeming it appropriate to grant applicant's request that the order herein be effective upon issuance:

It is hereby ordered, Pursuant to Rule U-23 and the applicable provisions of the act, and subject to the terms and conditions prescribed in Rule U-24, that the application be, and the same hereby is, granted forthwith.

By the Commission.

Assistant Secretary.
